

Custom Application Development

Streamline your business through development customized to your needs

"I have outsourced development before, but our experience with Cadre was exceptional. They listened to us, and delivered what we wanted – before deadline! The code was clean, and we were able to log in and see the project status and issues at all time. Thank you for helping us create a great product!"

Julia Winfree, Supervisor, North America General Motors Containerization

At Cadre, your business needs come first. Our process starts with a Cadre consultant meeting with you to help identify your needs and create a plan for best attaining them. Our certified project managers will then collaborate with you to determine your requirements, using their skills in advanced problem solving to suggest solutions that will work optimally within your environment.

Cadre Custom Application Development benefits include:

- **Access to Global Development Resources:**
Our development team has extensive experience in a wide variety of industries and technologies.
- **Reduce Time to Market:**
For your project, we will draw upon our internal class libraries built through our years of experience, reducing development time and overall costs.

• **Excellent Customer Service:**

To reinforce our commitment to consistent and quality customer satisfaction, Cadre partners with BOSSdev, a development firm that was recognized in the **top 5% of all Microsoft Gold Certified Partners for customer service** in a recent survey conducted by Microsoft.

Cadre can assist you with:

- Automating business processes
- Upgrading/updating legacy systems
- Integrating isolated data silos
- Improving collaboration and information delivery both internally and with external interfaces

In Addition to Quality Coding ... You Receive Skilled Analysis

Cadre consultants are highly experienced marketing, business and technology experts, who can provide you with background market research and analysis for your specific applications. They can advise you on marketability issues and can assist you with determining the best technology platform to bring your concept to reality.

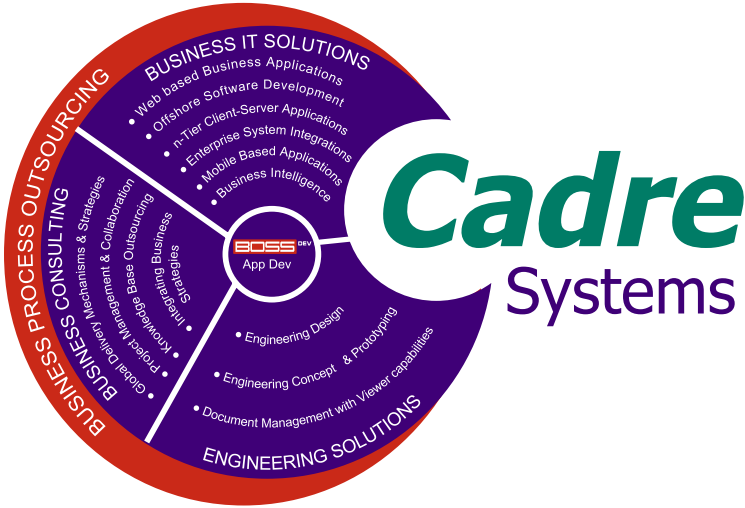

Areas of Development Expertise include:

- .NET/J2EE architecture and implementation
- eLearning portal creation
- Gaming solutions used by Fortune 500 firms
- SOA architecture for Enterprise Workflow Modeling
- eCommerce Portals: Features include shopping carts, catalogs and seamless integration with transactional payment solutions.
- Supply Chain Solutions
- Comprehensive Workflow Management Systems: Features include automated processes, accounting functions and centralized management of employees and vendors.
- Enterprise Application Integration and Maintenance

Let Us Bring Your Enterprise Technology Capabilities to a New Level
