

eLearning

Training solutions to fit your company's unique business needs

"Cadre assisted us with creating an online training center for our firm. They were excellent, taking our ideas and then creating a system that lets students log in, download a course, and take the exam when they're ready. It cost us a lot less than licensing one of the larger solutions (we checked!) and we are extremely pleased with the results. Our HR department can update courses with the content manager, and employees have told us it is easy to use."

William Hardy, Principal, Roosevelt Middle School

Getting your course materials online is faster and easier with the centralized management Cadre offers. Whether you need to adapt your offline materials into an online format or develop an entire information systems management site, Cadre can help. Your eLearning site can be customized to seamlessly integrate into your existing environment. You will receive solutions that make updating content, managing site features and tracking user progress easy for site administrators. Your eLearning solution will be interactive, intuitive and formatted with the features you want.

• Documentation:

Excellent communication is fundamental to a successful project. When working with us, you will receive frequent reports on the progress of your project based upon industry-standard templates.

We are experts at delivering quality code and proficient testing results. Our experienced staff becomes true partners in the creative process, suggesting solutions that can save your firm time, money and effort.

Cadre eLearning benefits include:

• Reduced Time to Market:

For your project we will draw upon extensive internal class libraries built through our years of experience.

• Experienced Staff:

Our staff has specific experience in developing eLearning solutions and will provide quality technical work.

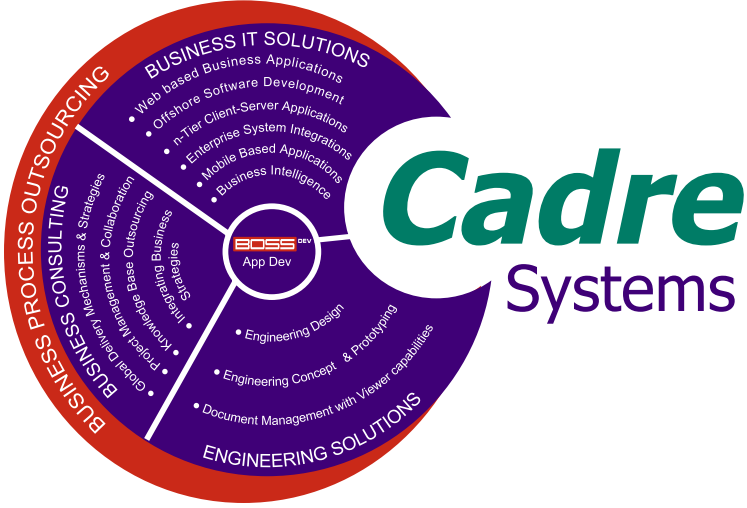

eLearning sites developed by Cadre can include:

- SCORM-compliant materials
- Scheduling/calendar
- Dynamic course catalog
- Skills training
- Tiered membership access
- Secure hosting
- Student tracking/scoring
- Certificates/awards
- Interactive quizzes/tests
- Full shopping cart (commercial courses)
- eLearning systems management

We can also provide ongoing support and maintenance for your site, ensuring that its performance and reliability will persist.
